Chemistry through Smart Logistics

Den Hartogh Logistics in a nutshell

Your bulk logistics service provider for the liquid chemical, polymer and dry bulk food industry – with almost a hundred years of expertise. That's Den Hartogh in a nutshell. Serving manufacturers, importers, exporters, distributors and traders we have moved and stored more than 15,300 different products across the world, such as:

Liquid Chemicals:

Monomers, isocyanates (MDI/TDI), glycols, latex, lacquers, inks, phenols, resins, solvents, polyols, herbicides,...

Liquefied Gases:

Cryogenic - oxygen, argon, nitrogen, LNG, CO₂, nitrous oxide, helium,...

Compressed - aerosols, LPG, refrigerants, DME, DMA, methyl chloride, ammonia anhydrous,...

Dry Bulk - Polymers:

PP, PE, PET, PTA, ABS, PVC,...

Dry Bulk - Food:

Sugar, malt, rice cacao, flour, salt, wheat,...

Global containerised bulk transport (intermodal transport)

Intermodal transport is the preferred way to move cargo over longer distances. It optimally combines various modes of transport. This method has proven to be a safe, cost-effective, flexible and sustainable way ensuring that shipments are efficiently carried to their destinations.

Our team, which is well-distributed across the globe, understands your international challenge and speaks the local logistics language. Supported by our state-of-the-art Transport Management System, the seasoned team is ready to carry out your transport orders. The transport fleet is strategically positioned across the global chemical regions and consists of 6,700 dry bulk containers and more than 18,000 tank containers for your liquid and gas chemicals. With this large operating network and our economies of scale, Den Hartogh is ready to solve any logistics challenge.

You're more than welcome to join our customer base of international market leaders and start using our fully integrated global door-to-door logistics solutions.

Road transport

Den Hartogh Trucking

We can provide both regional as well as international transport. So no matter where your products need to go, we'll make sure they get there.

Den Hartogh's transportation network is distributed globally. Based on specific needs and the distances to be covered, we optimise the use of road and

intermodal transport. The loading, traction and delivery of your goods is performed by our Den Hartogh drivers, working with the most sophisticated trucks. In addition to our own trucks, we maintain a large network of carefully selected partners, who operate according to the Den Hartogh safety standards.

Road Barrel transport

Road barrels are typically deployed in situations with dedicated fleets and traffic with large volumes and shorter distances. Den Hartogh's fleet consists of 400 road barrels, each with a capacity of 30,000 to 37,500 litres. Additionally, you have a choice of single or multi-compartment road barrels and steam and/or electrical heating systems. In other words: more than enough options to offer an optimal solution for any product that needs transporting.

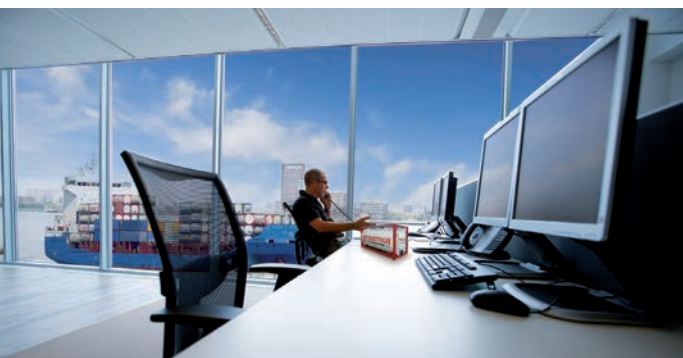

Supply Chain Management

- ▶ On-site logistics
- ▶ Chemical Cluster Services
- ▶ Turnarounds & Shutdowns
- ▶ 3rd party Fleet Management
- ▶ Intermediate Storage / Forward Stock

Contact

That's enough about us: how can we help you? By offering smart solutions that do more than simply transport your goods safely and reliably from point A to point B. Every situation is different and has its own logistic needs. It's about understanding your business and your concerns, resulting in tailor-made logistics solutions for your supply chain that you've had a hand in developing. No matter where you are in the world, we're able to offer personal advice. Want to talk? We'll listen.
